THE COMPLEX

The **26 maizonettes** building complex is composed of **2 types** of buildings in order to obtain morphological similarity which shall provide the total complex with a pleasurable appearance. All buildings have a total height of 7,50 meters and are composed of two or three floors (inc. basement).

The selection of construction of 2 types of buildings of a height equal to the one allowed in the area took place in order to achieve a minimum coverage of the plot so that large uncovered spaces may be laid out between the buildings. In this way the complex inhabitants may have more private green spaces and the possibility to have a direct view to the sea or to the green spaces in the area that is outside the Town layout, this shall be possible for all maizonettes.

Similarly all maizonettes shall have direct cooling from the summer sea breeze since the complex is only 20 meters from the beach!
